

**49mm Control Tube Cross Clamps (S-CMPX12X38)**

With our ongoing effort to make improvements to the VVS and Multibay products we have sourced an improved 49mm control tube cross clamp. This replacement clamp has the following benefits:

- 1) The captive nut is welded to the clamp making it easier to fit and install.
- 2) The clamps will be supplied with the set screw located in the captive nut
- 3) The new clamp uses an M10 x 25 set screw for added strength
- 4) The clamps will be supplied in easier to handle boxes of 50 off
